

# Metadata summit / workshop Montreal

- Need to agree (with Scott?) on a ½ day slot on Friday (?)
  - How long do we need? During the regular meetings or on Friday? Better an early morning session?
- It would be not only be on GeoDCAT, rather connecting all the dots
  - One session on the different metadata related work
    - DCAT, DCAT-AP and GeoDCAT developments
    - API records
    - STAC developments
    - ISO 19115 developments
    - How to link the dots?
  - One session on examples of GeoDCAT(-AP) implementations and issues

# Metadata summit / workshop Montreal

- One session on the workflow using the building block / profile approach
  - Starting from examples
  - Demonstrating the different steps in the workflow
- One session on dedicated topics
  - Licensing
  - Provenance

4

# Code-sprint London (07/2024)

- Metadata is part of it
- To be clarified what will be done
- Who will go there?

# Code-sprint Autumn

- Hybrid event
- Connected to the ISO/TC 211 meeting in Sydney (week of 11/11/2024)
  - After? (OGC Tc is the first week of November 4-8/11)
- What would be the concept of the code-sprint? What would we like to 'test'?
  - Transformations between different 'profiles'?
  - Linking to STAC and API records?
  - ...?
- How would remote involvement work?
- Experience from other code-sprints?

# SEMIC activities

- Dedicated follow-up meeting
- Public events (3rd workshop):
