

Agenda

- Report on July OGC Codesprint
 - Anyone there that can report on relevant topics covered?
- November Codesprint discussion
 - Gobe Letter - Combined Codesprint possibility?
- Canonical Schema mappings
 - Use cases to support
 - Building Blocks

OGC Open Standards Code Sprint

- Who was there?
- What was covered?
- What was most relevant to our work?
- How might this affect a November Code Sprint

November Metadata Code Sprint Planning

- Proposed generic code sprints (none have been confirmed):
 - 11-13 November, potential generic Code Sprint covering OGC and ISO metadata and data quality standards. MetaCat DWG and TC 211 have offered to host as part of TC 211 plenary in Sydney, Australia.
 - 18-20 November, potential generic Code Sprint covering all interested OGC standards working groups. IIT Bombay has offered to host it in Hyderabad, India.
- As it would be difficult and risky to hold two separate code sprints over two consecutive weeks and in two separate countries, it is likely that we will have to fold them into one.

November Metadata Code Sprint Planning

- Funding:
 - Code sprints rely on funding from sponsors to support the travel of OGC staff and some of the participants. It means that we can only confirm a code sprint once we have secured sponsorship.
 - In some cases, the sponsor may have a preference of where the code sprint should be held.
- Currently no potential sponsors have confirmed their interest in sponsoring a generic code sprint in Q4. Over the coming weeks, OGC Staff will engage with some potential sponsors regarding the Q4 2024 code sprint, so we will let you know if/when the situation changes.

November Metadata Code Sprint Planning Discussion

- Joined up code sprint -
 - What would this look like?
 - Would this fit our needs?
- Time and Place?

Canonical Mappings

- (Geo)DCAT work in place
 - Semic GeoDCAT-AP 3
 - Alexandra Kokkanaki - National Oceanography Centre, Blue Cloud, FAIR-EASE
 - Other DCAT mapping work?
- Use Cases
 - ISO 19115 - CKAN
 - Records - STAC - other standards
 - Other Use Cases?
